3 x 40MW Flares including gas filtration.

OUR INVOLVEMENT

- Design specification
- Plant design
- Procurement and logistics
- Installation
- Commissioning
- Training
- Follow up maintenance

OUTCOME/BENEFITS

Eneraque delivered the product within an extremely tight time schedule. The whole project was airfreighted out and installed successfully within budget and under extremely difficult weather conditions. Flares installed ensured gas was burnt to comply with highest level of European emissions standard. Allowing the mine to claim the lowest carbon tax emissions output.
