

WHITEHAVEN GOAF TRAILER AND SKIDS

LOCATION/SITE

Narrabri coal operations

CLIENT

Whitehaven Coal

DATE

2012

NARRABRI, NEW SOUTH WALES

PROJECT/OVERVIEW

This was an development concept as a fully relocatable trailer complete with CAT engine driving a Tuthill blower, pulling gas from 3 separate skids/ boreholes.

OUR INVOLVEMENT

Full turn key, wireless communications investigation and engineering. Design of the scada, electrical, mechanical, process, structural components and complete construction of the above.

OUTCOME/BENEFITS

Eneraque provided a complete solution of this GOAF trailer to allow the underground longwall to continue to operate. We have exceeded NCO's expectations with the project delivered on budget and within timeframe. Eneraque established strong relationships with sub contractors during the project which will deliver further successfully installations into the Gunnedah Basin and Hunter Valley.
