PAPUA NEW GUINEA / OIL & GAS

PROJECT/OVERVIEW

To design, engineer and manufacture heavy duty, single and dual axle lighting plants, that can be easily moved by a light vehicle and meet the extreme site conditions experienced in the oil and gas industry, especially in PNG.

OUR INVOLVEMENT

To design, engineer and manufacture, a very robust and cost effective lighting plant to perform in the gold mines of PNG and extreme locations within the oil and gas industry. The lighting plant must also be able to withstand a harsh environment and harsh operating requirements.

OUTCOME/BENEFITS

- Custom designed and built
- Reliable product for remote operations
- Backup support on site
- Australian design to suit harsh conditions
- Fully weatherproof in all aspects
- Easy to use operation
- Meets all relevant mining and Australian standards
- Many options to suit individual applications
